Atmospheric Research, 31 (1994) 359
Elsevier Science B.V., Amsterdam

Contents Volume 31, 1994

Editorial
N. Fukuta and P.E. Wagner 1
A molecular model for homogeneous nucleation
H.R. Kobraei 3
On the variation of cloud condensation nuclei in association with cloud systems at a mountain-top location
T.P. DeFelice and V.K. Saxena 13
Cloud-active particles from African savanna combustion experiments
Pham-Van-Dinh, J.-P. Lacaux and R. Serpolay 41
The temperature of an evaporating water droplet with a monolayer coating: comparison of experiment and theory
G.O. Rubel and M. Seaver 59
The role of clouds in the enhancement of cloud condensation nuclei concentrations
V.K. Saxena and J.D. Grovenstein 71
Varying the condensable water vapor content in an expansion cloud chamber
J.L. Schmitt and D.E. Hagen 91
Efficacy test of a haze chamber with the CCN produced by the burning of savannah grasses
R. Serpolay 99
Ice-producing processes in a North Dakota cumulus cloud
A.G. Detwiler, P.L. Smith, J.L. Stith and D.A. Burrows 109
Potential role of nuclei in cloud element formation at high altitudes
D.E. Hagen, J. Podzimek, A.J. Heymsfield, M.B. Trueblood and C.K. Lutrus 123
Increasing of the solubility of the AgI nuclei in rain drops induced by the complex formation with dominant ions
T.V. Reutova, L.Z. Zhinzhakova and M.M. Chernyak 137
On the Terminology of "Thermal Diffusion Chamber"
N. Fukuta 143
Mixtures of nitrate and sulfate in individual particles in acidic fogs
Y. Ishizaka and G.-W. Qian 147
Initial cloud droplet number concentrations in clean and polluted areas: Simulation by a condensation model and comparison with measurements
W. Seidl 157
On the description of aerosol particle size distribution
Y. Liu and F. Liu 187
Mixed aerosol particles as effective ice nucleating systems
V.Ye. Smorodin 199
New microphysics sensor for aircraft use
H. Gerber, B.G. Arends and A.S. Ackerman 235
The continental carbon cycle during the last glacial maximum
J. Servant 253
Introduction
S. Keevallik 269
Light scattering by nonspherical particles: Remote sensing and climatic implications
K.N. Liou and Y. Takano 271
Spectroscopic parameters of atmospheric gases
J.-M. Flaud 299
Radiative-convective disequilibrium
D.A. Randall, Q. Hu, K.-M. Xu and S.K. Krueger 315
Planned EOS observations of the land, ocean and atmosphere
J. Dozier 329
